

Darul Ulum College of Victoria

11 October 2021

Assalamu Alaikum Wr. Wb.

Dear Parent,

RE: Darul Ulum Academy [Mickleham campus] Update

I pray that this letter finds you and your family in the best of health and spiritual wellbeing.

I write this correspondence to keep you abreast with the recent construction updates of our Mickleham campus. Alhamdulillah, the construction of the new site commenced on time with significant progress being made on the ground despite the initial limitations associated with the Covid-19 lockdown earlier this year.

However, as the lockdown was further prolonged with an onsite working capacity not exceeding 25% and the with full shut down of the building industry for a fortnight, unfortunately, these measures have in turn impacted the completion due date of the new building. As you are aware, the entire industry in Victoria has been negatively impacted with the recent additional restrictions.

Consequently, we have received updated confirmation from our builder reassuring us that the new facility will be handed over during mid-Term 1, 2022, with the occupancy being issued and ready to start at the beginning of Term 2, 2022, Insha'Allah.

Nonetheless, to avoid any delays with your child's schooling, I am pleased to inform you that part of our internal contingency plan, we have tentatively secured a place for your Foundation child in Term 1 [2022] at Darul Ulum College in Fawkner, if this arrangement is to your satisfaction.

The Foundation Mickleham cohort will be allocated the new MK building which consists of state-of-the-art classrooms and facilities. Moreover, to avoid any potential challenges with transition, the same Foundation teacher will start at the Fawkner campus in Term 1 and will be moving alongside her students to the Mickleham campus in Term 2, 2022, Insha'Allah.

In addition to the above, should transport be an issue in Term 1, the school will be proving a bus service to this cohort of students with a 50% subsidy from the school.

We acknowledge that this delay is not to the satisfaction of any stakeholder, including the school's management, but we hope that you can appreciate the immense challenges surfacing in the prevalent climate, particularly in the building industry.

To further gauge your input and feedback in this regard, an office personnel will be in contact with you soon.

May Allah reward you for your understanding and enable us to serve you in the near future.

Kind Regards,

Abdurrahman Gokler [on behalf of Management]

Principal
